

Caterham Super 7- Fastest Legal Road Car Today

Caterham Super 7 is an extremely well designed and fastest legal road car today. It is based on the original design of Lotus 7 designed and built by Colin Chapman in 1950's. The rights for the production were then bought by Caterham Cars UK in 1973. The survival of this car for more than half a decade indicates the ultimate driving experience Caterham Super 7 withholds.

Caterham is a two seated, extremely light weight car. This enables the acceleration to feel super quick. It can achieve the speed of 0 to 60 mph in less than 5 seconds. Caterham is built to excel everywhere and for those who want to have the best road experience. It is sure that you will enjoy the ride in your Caterham Super 7. The continued productions of Caterham Super 7 over the years indicate its finest quality and outclass performance.

Although the Caterham might look quite frail to the eyes of the onlookers, it is built perfectly and is quite strong. For those who drive it will know that the drive in Caterham Super 7 is extremely smooth and comfortable. The car does not give any indication of being feeble.

With an old fashioned look to it, Caterham Super 7 looks stunningly fine. The original design of Lotus 7 has been enhanced to include the modern technology and sophistication to meet the requirements of this century. Caterham Super 7 has proved to have very smooth handling and superior performance both on the road and track.

Caterham Super 7 is extremely comfortable and can accommodate even large drivers. The design is a very simple one with minimal complications, so that, it is easy to use. It has seat so close to ground that you can even touch the road. The engine and other specifications are also kept simpler and there are few unrequited instruments. Caterham super 7 has four well tuned disc brakes.

Caterham Super 7 is reasonably very cheap for a car of this high performance and handling. Although the quality and practicality is not the best, Caterham Super 7 is one of the best cars you can afford in such a low range, which will make you enjoy your driving.

Each Caterham Car is hand built under intense supervision and care and with the best specifications. The car incorporates all the features that an individual would like to have in their ultimate car. It ensures that it is comfortable to the highest degree. Also it has the weather specifications for all kind of weather, like rain cover, heaters, air conditioner etc.

Each Caterham Super 7 is built in close collaboration with its future owner to work on custom specifications. The components used for the car are of the highest quality. Caterham Super 7 is equipped with 147 horse power Ford Focus Zetec four-cylinder.

Caterham can serve dual purpose. It can both be used for a personal ride on the road for work and home. If you want to have a race with it, Caterham Super 7 will certainly outperform all other cars. Caterham Super 7 has a proven track record and in the previous year it had been banned from some of the races because of its extreme speed.

If you are craving for an ultimate driving experience then, Caterham Super 7 will prove to be the best car for you.
